

Vulcan Resources

ABOUT VULCAN RESOURCES

Vulcan Resources Limited has base and precious metals development and exploration projects in Finland. These projects are on hold and Vulcan is currently focussed on acquiring near term development projects.

The Company's principal project is the 800,000 tpa, 100% owned Kylylahti underground base metal deposit located near Outokumpu in eastern Finland. It has a Resource of 8.1 million tonnes grading 1.18% copper, 0.24% cobalt, 0.22% nickel, 0.47% zinc and 0.66 g/t gold¹.

Kylylahti is fully permitted and a Definitive Feasibility Study completed.

The Kuhmo Nickel Project is 95% owned by Vulcan and Vulcan has completed Resource delineation drilling at four shallow nickel-copper-PGE sulphide deposits.

Cash on hand \$28.44 million

Market Capitalisation at 9.5 cents per share: \$21.6 million

Quarterly Report - June 2009

Overview

Vulcan continued to assess opportunities for merger and acquisition during the quarter. The Companies principal focus continues to be on gold, copper and energy projects in Africa, Australia and Asia. Vulcan has been very active, but the nature of these activities, which are conducted under confidentiality, make it difficult to communicate to investors details of the individual projects that have been assessed.

Vulcan continues to hold the Kylylahti project in abeyance whilst investigating opportunities to realise value from these assets.

The Company has reduced its cash outflow to levels sufficient to support the preservation of the substantial investment in the Finnish projects and the assessment of new opportunity. Vulcan has cash of \$28.44 million and has a cash backing of 12.4 cents per share. It is trading at a discount to cash backing.

Kylylahti

The Resource estimate and geological model for the Kylylahti deposit have been updated following the drilling undertaken in 2008 and a high grade Resource of 4.2 million tonnes at 1.8% copper, 0.3% cobalt, 0.2% nickel, 0.6% zinc and 0.7 g/t gold (see Table 1) has been defined within the global Resource.

Table 1: 2009 High Grade Resource

Classification	Tonnes	Cu (%)	Co (%)	Ni (%)	Zn (%)	Au (g/t)
Measured	340,000	1.95	0.33	0.13	0.58	0.75
Indicated	3,733,000	1.82	0.29	0.17	0.63	0.74
Inferred	119,000	1.39	0.30	0.17	0.68	0.62
Total	4,192,000	1.82	0.29	0.16	0.63	0.74

The high grade Resource was estimated at a nominal 0.7% copper cut-off grade and contains 52% of the tonnes of the global estimate and 79% of contained copper and 65% of contained cobalt. Full details of the estimation process are given in ASX release dated 7 July 2009.

¹ Measured, Indicated and Inferred Resource. For detailed breakdown see ASX release dated 7 July 2009.

The Kylylahti Project is fully permitted, a definitive feasibility study has been completed and front end engineering commenced. As markets failed in September 2008 the project was put on hold due to finance being difficult to obtain, collapsing metal prices and uncertainty on the ability of the proposed purchaser of nickel-cobalt concentrate having the ability to accept product.

Vulcan is investigating alternative production and offtake strategies for Kylylahti.

The updated global Resource is:

Table 2: 2009 Global Resource

Classification	Tonnes	Cu (%)	Co (%)	Ni (%)	Zn (%)	Au (g/t)
Measured	617,000	1.29	0.26	0.19	0.42	0.55
Indicated	7,135,000	1.19	0.24	0.22	0.47	0.68
Inferred	348,000	0.88	0.23	0.23	0.47	0.64
Total	8,099,087	1.18	0.24	0.22	0.47	0.66

Kuhmo Nickel

The Kainuu Regional Environment Centre has given the final approval on the Suomussalmi Nickel Project environmental impact assessment report.

Updates on the Suomussalmi resource estimates are nearing completion. These will incorporate 2008 drill results within the Vaara, Hietaharju and Peura-aho resource models.

Initial field work to inspect targets generated from the 2008 VTEM survey has commenced, and will continue over the summer field season. Approximately 60 geophysical targets will be studied resulting in target definition and recommendations for further exploration.

CORPORATE ACTIVITY

Cash at hand

Vulcan sold under licence geophysical data to another mining company active in Finland for €350,000.

As reported in the attached Appendix 5B, cash on hand at end of March 2009 was A\$28.44 million. This amount does not include interest earned that is yet to be received.

COMPETENT PERSON STATEMENT

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Dr Alistair Cowden BSc (Hons), PhD, MAusIMM, MAIG and Mr Jarmo Vesanto, MSc, MAusIMM, who are full time employees of the Company and have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as Competent Persons as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Alistair Cowden and Mr Jarmo Vesanto consent to the inclusion in the report of the matters based on their information in the form and context in which it appears.
