

**Global IP Sound Receives *Communications Solutions*TM Magazine's
"Product of the Year" Award for 2005**

VoiceEngine Multimedia Honored for Outstanding Innovation

SAN FRANCISCO — June 14, 2006 — Global IP Sound (GIPS) today announced that its VoiceEngine Multimedia product has won the Product of the Year Award from Technology Marketing Corporation's (TMC[®]) *Communications Solutions* magazine. GIPS is the leading provider of embedded voice-processing solutions for the Voice over IP (VoIP) market

Built on GIPS' speech processing technology, VoiceEngine Multimedia delivers high quality video communications support, in conjunction with the power and proven performance of the company's VoiceEngine product.

"Video conferencing, rich multimedia and other collaboration initiatives are major drivers of the growth in IP communications," said Gary P. Hermansen, president and CEO of Global IP Sound. "Our integrated IP voice and video processing technology is employed by some of the world's largest companies to deliver on these initiatives and rapidly bring high-quality IP-based voice and video solutions to market."

Global IP Sound's VoiceEngine Multimedia product provides:

- A complete framework for both video and voice soft phones
- The best available combined video and audio performance on the market
- Advanced techniques to handle jitter, packet loss, CPU and bandwidth constraints
- Multiple platform support
- Support of any voice and video standard

"Each year Communications Solutions magazine honors companies that have demonstrated leadership as well as excellence in technological advancement and application refinement," said Rich Tehrani, TMC President and Group Editor-in-Chief of Communications Solutions. "Global IP Sound continues to deliver ways to fuel the innovation and help improve the customer experience for the companies that use its products."

About Global IP Sound

Founded in 1999, Global IP Sound develops embedded voice processing technologies for real-time communications over packet networks. GIPS SoundWareTM provides better than PSTN voice quality and fidelity in end-to-end IP communications with robustness against packet loss. Global IP Sound's world-renowned speech processing and IP telephony experts deliver these solutions to applications developers, gateway and chip manufacturers. Companies using GIPS SoundWareTM products include Nortel Networks, Skype, WebEx, Yahoo!, AOL, EarthLink and other key players in the VoIP market. Global IP Sound is a member of the Intel[®] PCA Developer Network, the Motorola Design Alliance, Symbian Platinum Partners and Texas Instruments' third party developer network. Global IP Sound has headquarters in San Francisco and offices in Stockholm, Hong Kong and Boston. More information is available at www.globalipsound.com.

About TMC[®]

Technology Marketing Corporation (TMC) publishes four print publications: *Customer Interaction Solutions*, *INTERNET TELEPHONY*, *SIP Magazine* and *IMS Magazine*. TMCnet, TMC's Web site, is the leading source of news and articles for the communications and technology industries. Ranked in the top 1,400 sites in the world by alexa.com*, TMCnet serves more than one

million unique visitors each month. TMC is also the first publisher to test new products in its own on-site laboratories, TMC Labs.
