**GLOBAL IP SOLUTIONS ANNOUNCES AVAILABILITY OF INTEROFFICE
VOICE TRUNKING OFFERING MAJOR REDUCTION IN TELEPHONY
COSTS FOR ENTERPRISES**

**Interoffice Voice Trunking Solution Offers Dramatic Cut In Telephony Costs
For Enterprises**

SAN FRANCISCO — March 12, 2007 — Global IP Solutions (GIPS), the leading provider of embedded media processing solutions, announced today the availability of Interoffice Voice Trunking (IVT), which can offer Enterprise customers free, high-quality voice over any network, reducing the high cost of regular phone toll charges within an enterprise.

“Enterprises no longer need to absorb the high costs of PSTN toll charges as GIPS’ Interoffice Voice Trunking provides secure, first-rate voice quality”, said Gary Hermansen, President and CEO, GIPS. “Our Solutions’ team continues to bring high-quality communications technology offerings to IP based networks”.

IVT allows Enterprises to use their existing TDM or IP-based systems to call other sites within their enterprise without incurring expensive long distance phone charges. IVT also works with traditional PBXs with the use of a voice gateway. IVT is made possible by GIPS’ breakthrough technology that puts the “smarts” at the edge of the network, rather than the middle. As a result GIPS enables high-quality voice to be transmitted over any network, including those without “quality of service”, such as the public Internet

GIPS Solutions’ products are fully compatible with the IP-PBXs from Cisco, 3Com and Avaya as well as any other H.323 compatible PBX, including circuit switched telephone equipment. IVT runs on any Windows 2000 or XP server, which enables companies to extend the useful life of legacy hardware and also supports any broadband Internet connection.

About Global IP Solutions

Global IP Solutions offers multimedia technologies for real-time communications over packet networks and enable companies to deliver IP applications that offer the highest quality user experience, as well as revenue-enhancing opportunities across a multitude of devices and services. Global IP Solutions provides best-in-class voice and video quality and fidelity in end-to-end IP communications with robustness against packet loss. Global IP Solutions' world-renowned media processing and IP telephony experts deliver these solutions to service providers, enterprises, applications developers, network equipment, gateway and chip manufacturers. Companies using Global IP Solutions products include Nortel, Skype, WebEx, Yahoo!, AOL, EarthLink, BlueCross/BlueShield and other key players in the VoIP market. Global IP Solutions is a member of the Intel® PCA Developer Network, the Motorola Design Alliance, Symbian Platinum Partners and Texas Instruments' third party developer network. Global IP Solutions has headquarters in San Francisco and offices in Santa Barbara, Stockholm, Hong Kong and Boston. More information is available at www.gipscorp.com
