

## **GLOBAL IP SOLUTIONS VIDEO SOLUTION TO BE USED IN ORACLE® COMMUNICATOR**

**San Francisco — August 13, 2007** — Global IP Solutions (GIPS), the leading provider of embedded media processing solutions, announced today that Oracle plans to incorporate the GIPS VoiceEngine Multimedia LSVX video codec into Oracle® Communicator, a SIP/SIMPLE-based PC softphone client that allows communications service providers to set up sessions including voice and video calling, presence status and instant messaging.

Communications industry customers will use the integrated solution in conjunction with the Oracle Communication and Mobility Server, which allows developers to easily build, deploy and manage converged applications that combine SIP and Web capabilities on a single platform. Oracle Communicator and Oracle Communication and Mobility Server are both key components of the Oracle Service Delivery Platform and Oracle Fusion Middleware.

GIPS video technology is renowned throughout the voice over IP (VoIP) industry for its robust, high-quality performance under deteriorating network conditions. GIPS VoiceEngine Multimedia LSVX offers unsurpassed video quality for real-time two-way, high-quality video. The technology will complement Oracle's use of GIPS' voice technology.

"Communications service providers are looking for compelling, high quality multimedia applications for end-users and enterprises," said Vittorio Viarengo, vice president development, Service Delivery Platform, Oracle. "The inclusion of GIPS VoiceEngine Multimedia LSVX video in Oracle Communicator further broadens the array of revenue generating services available on the Oracle Service Delivery Platform."

"We are proud that GIPS' technology will be incorporated into the world's largest enterprise software company's VoIP solution," said Gary Hermansen, president and

chief executive officer, Global IP Solutions. "Oracle sets the bar in technology standards and we are happy that GIPS is again recognized for its industry-leading technology."

Frost & Sullivan's senior IP communications analyst Lynda Starr said: "The demand for IP-based enterprise communication systems is set to increase dramatically as customers are looking to derive maximum benefits from collaborative communication. With GIPS VoiceEngine Multimedia LSVX, Oracle Communicator will provide an exceptional VoIP solution with superior quality of service."

GIPS VoiceEngine Multimedia LSVX provides the complete framework for both video and voice soft phones with advanced techniques to handle jitter, packet loss, CPU and bandwidth constraints on multiple platforms.

#### **About Global IP Solutions**

Global IP Solutions (GIPS) provides best-in-class voice and video in end-to-end IP communications with robustness against packet loss for service providers, enterprises, applications developers, network equipment, gateway and chip manufacturers. GIPS' customer list include Nortel, Samsung, Skype, WebEx, Yahoo!, AOL, EarthLink and other key players in the VoIP market. GIPS is a member of the Intel® PCA Developer Network, Motorola Design Alliance, Symbian Platinum Partner Program and Texas Instruments' third party developer network. GIPS is headquartered in San Francisco with offices in Stockholm, Boston and Hong Kong. More information at [www.gipscorp.com](http://www.gipscorp.com)
