

## **LEUCOTRON IMPLEMENTS GIPS VOICE TECHNOLOGY IN LATIN AMERICA TO ENSURE HIGH-QUALITY VOIP COMMUNICATION**

***Brazilian IT and Telecom Solutions Provider Leucotron will Utilize GIPS iLBC Codec  
Technology***

**San Francisco — April 7, 2008** — Global IP Solutions (GIPS) the leading provider of high-quality IP multimedia processing, today announced that Leucotron, the Brazilian IT and telecom solutions provider, will embed GIPS' voice technology into its IP-PBX telephones to ensure high-quality communication.

All of GIPS' technologies were specifically designed for IP networks to ensure high-quality Voice over IP (VoIP) communication even over congested networks with packet loss. The strength of GIPS technology is the robust voice quality it provides on "real-life" wired and wireless networks especially in markets with constrained bandwidth requirements.

"Leucotron has over 100,000 customers in our client base serving over 2 million users," said Dilson Morales, CEO of Leucotron. "It is important for Latin America businesses to ensure the best quality phone communication, which is why Leucotron is implementing GIPS iLBC technology to ensure a high-standard of call quality."

"Leucotron is renowned as a major player in the Brazilian IP Telephony Market," said Steve Rust, vice president of business development at Global IP Solutions. "Their commitment to customers is evident in their use of the best technology. GIPS VoIP technology will enable Leucotron to continue innovating to ensure maximum efficiency and quality for their customers' telecommunications."

Leucotron launched the first ever, Brazilian-made Digital PABX System in 1996 and continues to innovate leading products. The company is recognized as a major developer of cutting-edge technology in IP and Conventional Telephony.

### **About Leucotron**

LEUCOTRON is a Brazilian company specialized in the development of integrated solutions on Telecommunications for Corporate Customers and Small Office/ Home Office (SOHO). Among other products, LEUCOTRON develops PABX phone systems for small, medium and large companies and homes; in addition to solutions on phone sets; software and management program of telephone costs as well as solutions on VOIP (Voice over Internet Protocol) communication.
